

It is Strongly recommended by both the International Powered Access Federation (IPAF) and the Health and Safety Executive (HSE) that a Full Body Safety Harness complete with Adjustable Lanyard is worn in all Boom type Hydraulic Platforms.

Acrolift can supply you with a suitable harness and lanyard in a kit that has been Approved by IPAF:

- Accredited to: BS EN 361 & BS EN 354**
- Web Material: 45mm Water Repellent Polyester**
- Weight: 1.15kg (Harness Only)**
- Features: Front & Rear "D Type" Attachments**
- Container: Tuff Plastic Storage Case**
- Approvals: by IPAF**

This complete harness safety Kit combines a front & rear "D" harness and an adjustable restraint lanyard supplied in a tough plastic storage case.

The case provides protection when not using the equipment. The kit is designed to give maximum protection against vertical ejection from boom type hydraulic work platforms.

All kits come complete with all the necessary connectors and can be utilised for other work at height applications.

Kits are available and in stock ready to be dispatched.
